Football Analyst, specialized in technical scouting, the use of advanced metrics and data visualization. Football has always been my passion, and I have been working in this field since 2014. I am familiar with the entire ecosystem of professional football analysis, having worked for clubs and national teams, sports directors, coaches, physical trainers, data provider companies, football innovation agencies and startups, usually in a Senior role. My football knowledge, vast experience and analytical thinking help me transform ideas into reality.
